

PFAS Declaration

Per- and polyfluoroalkyl substances (PFAS)

February 2025
Revision - 1

Introduction:

Circad Design Limited specializes in the design and manufacture of electronics' assemblies across all industries. We are committed to regulatory compliance, environmental responsibility, and transparency regarding the presence of Per- and Polyfluoroalkyl Substances (PFAS) in our products.

PFAS Definition:

PFAS refers to per- and polyfluoroalkyl substances as defined by regulatory bodies such as the U.S. Environmental Protection Agency (EPA), the European Chemicals Agency (ECHA), and other relevant authorities.

Supplier Information & Limitations:

We source components from multiple suppliers and actively request PFAS compliance statements to assess material composition. However, due to the complexity of global supply chains and proprietary manufacturing processes, we rely on supplier declarations and cannot independently verify the complete absence of PFAS in all supplied materials.

PFAS Content in Our Products:

Based on available supplier data:

- We do not intentionally add PFAS to our products during manufacturing or assembly.
- Some raw materials, such as PTFE-based laminates, coatings, or electronic components, may inherently contain PFAS.
- Where supplier declarations are unavailable, we cannot fully guarantee the absence of PFAS.

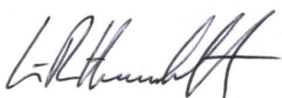

Compliance & Ongoing Efforts:

- We engage with suppliers to request material composition disclosures, including PFAS content.
- We monitor and comply with global regulations.
- Where feasible, we explore alternative solutions to reduce restricted substances.
- Supplier PFAS declarations are available upon request, if provided to us.

Disclaimer:

This declaration is based on reasonable due diligence and supplier-provided data. It does not constitute a legally binding guarantee regarding PFAS content. Customers with specific PFAS restrictions should contact us for further discussions or engage directly with component manufacturers for the most accurate and up-to-date material disclosures.

Signed

Gavin Howlett
Chief Executive Officer
